AOV by State

Revenue vs Review Score

KEY INSIGHT : Revenue is heavily concentrated: São Paulo alone drives the largest share of sales, and the top 5 categories account for the bulk of revenue — signalling both a growth engine and a concentration risk. Meanwhile, high-selling categories with below-average review scores flag where commercial success is outpacing customer satisfaction.

2. CUSTOMER INTELLIGENCE

RFM Scatter Plot

KEY INSIGHT : Champions and Loyal Customers make up ~37% of the base but drive the majority of revenue, while At-Risk and Lost customers (18K) represent a sizeable win-back opportunity. With repeat purchase rate at just 3%, retention, not acquisition is the biggest lever for growth.

Channel Performance Overview

MARKETING_CHANNEL	Leads	Conversion Rate	Revenue	AOV by Channel	CLV by Channel
direct_traffic	499.00	11%	27,549.80	142.75	491.96
display	118.00	5%	1,207.95	172.56	201.33
email	493.00	3%	9,122.41	414.66	608.16
organic_search	2,296.00	12%	235,956.58	195.33	870.69
Total	8,000.00	11%	775,815.63	171.72	921.40

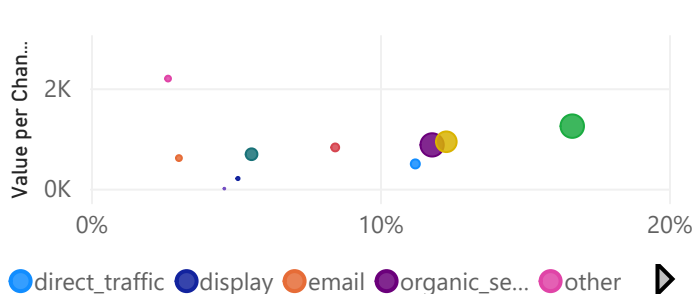

Conversion Rate by Source

Revenue by Source

Customer Value vs Conversion Rate

KEY INSIGHT : Organic search drives the most value, highest revenue (\$235.9K) and CLV (\$870.69) despite lower volume — while paid search leads on customer acquisition. Email underperforms with only 3% conversion, making it the clearest candidate to optimize or cut.

4. CUSTOMER EXPERIENCE

Analyze delivery performance, reviews and their impact on customer behavior

92%

Delayed Orders %

8%

Avg Review Score

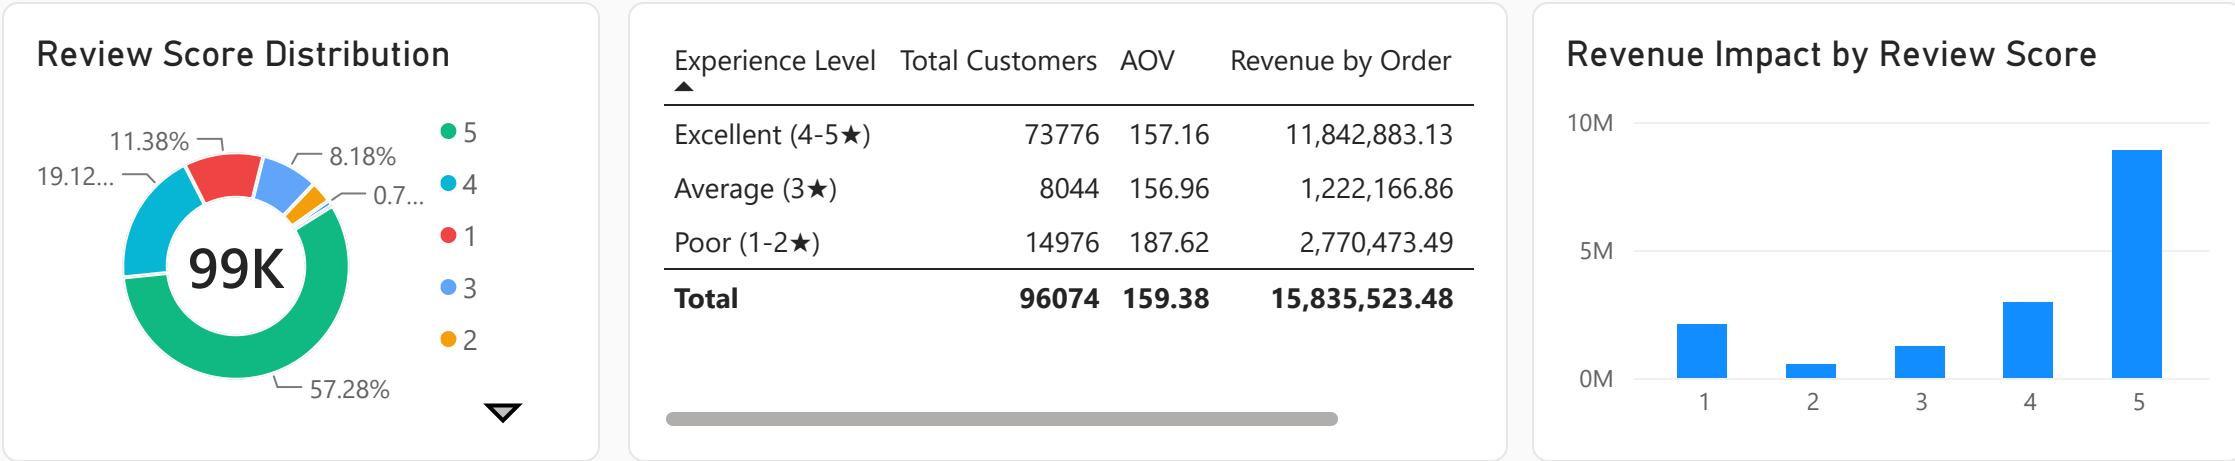

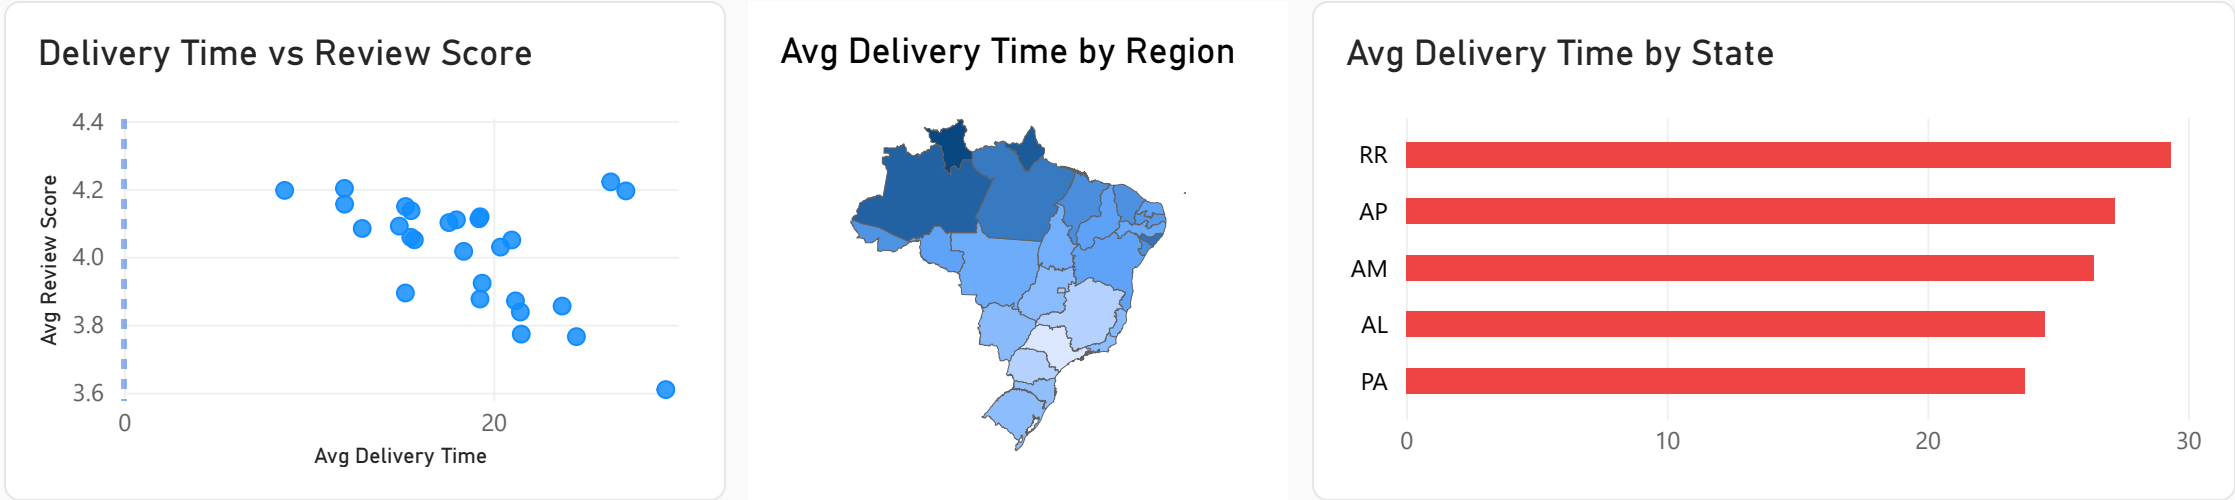

4.11

Low Rating %

15%

Revenue Affected

2.77M

KEY INSIGHT : Delivery delays are driving down satisfaction and revenue: review scores fall sharply as delivery time exceeds 10 days, and the slowest states (RR, AP, AM) average 25+ days, well above the 12.5-day norm. With 15% of customers rating 1-2 and \$2.77M in revenue affected, faster delivery in these regions is a direct lever for retention and revenue.
